PROFESSIONAL SUMMARY

Fullstack Developer experienced in building end-to-end web applications, from requirement gathering and system design to development and deployment. Skilled in developing modern frontend applications and scalable backend services using APIs, gRPC, and Microservices, with experience in database design and AI-powered features using RAG.

SKILLS

Languages: Golang, Java, SQL, JavaScript, TypeScript, C++

Frameworks | Runtimes: Next.js, Vue.js, Express, Elysia, Spring Boot, Node.js, Bun, Echo

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Redis

Backend: RESTful API, gRPC, JWT/OAuth2, Microservices, Hexagonal Architecture

DevOps | Operations: Docker, CI/CD, Unit Testing, Nginx, Prometheus, Grafana, Keycloak

Developer Tools | AI: Git, VS Code, OpenCode, OpenAI Codex

WORK EXPERIENCE

Backend Developer | Gridwhiz (Thailand) Co., Ltd.

Jun 2026 - Jul 2026

- Designed and developed backend services and APIs to support web and mobile applications, including defining service responsibilities, data flows, and integration between system components.
- Designed and implemented Microservices using gRPC for inter-service communication, focusing on clear service boundaries, scalability, and maintainable backend architecture.
- Developed services based on the Open Charge Point Interface (OCPI) protocol, implementing standardized data exchange and integration to support interoperability between EV charging platforms.

Fullstack Developer (Freelance) | Kanaratbamrungpathumthani School

Jul 2025 - Jan 2026

- Managed the end-to-end development lifecycle by communicating directly with stakeholders to gather requirements, analyze business needs, evaluate technical feasibility, and translate requirements into system designs and plans.
- Designed and developed the overall application architecture, database schema, APIs, and workflows for both user-facing and administrative applications, including role-based access control (RBAC) for different operational roles.
- Developed key features including a high-concurrency registration system, automated room allocation, XLSX data processing, and certificate generation workflows integrated with MinIO object storage.
- Managed production infrastructure and deployment on Ubuntu VM, configuring Docker and Nginx as a reverse proxy, along with Prometheus and Grafana for system monitoring and operational visibility.

Backend Developer Intern | Innovasive Co., Ltd.

Jan 2025 - Jul 2025

- Designed and developed backend services, RESTful APIs, database schemas, and Protobuf definitions for gRPC communication within a Microservices-based architecture supporting web and mobile applications.
- Designed and developed AI-powered features using Retrieval-Augmented Generation (RAG), including PostgreSQL vector-based data storage to support semantic search and contextual information retrieval.
- Applied Hexagonal Architecture principles to separate core business logic from external dependencies, improving system modularity, maintainability, and flexibility for future development.
- Collaborated with the development team to analyze technical requirements, design appropriate solutions, and identify and resolve critical issues to improve overall system stability.

PROJECT EXPERIENCE

School Management System | Senior Project

Jul 2025 - May 2026

- Designed and developed a centralized, service-based platform to address data fragmentation across school systems, enabling new databases and data structures to be integrated into the platform and exposed through standardized APIs for other applications and services to access and consume.
- Architected the platform using Microservices and Hexagonal Architecture, designing service structures, database schemas, and RESTful APIs with Swagger documentation to ensure clear service boundaries, extensibility, and maintainability as new data sources and services are added.

Tech Stack: Vue, Go (Echo), PostgreSQL, MinIO, Keycloak, Nginx, Docker, Microservices, Hexagonal Architecture

EDUCATION

King Mongkut's University of Technology Thonburi, Bangkok Thailand

Aug 2022 - Jun 2026

Bachelor of Science in Information Technology (B.Sc.IT)
